

SHIFENG NYLON-6 TIRE CORD

SHIFENG NYLON-6 TIRE CORD is one subsidiary company of SHIFENG GROUP---the largest agricultural machine manufacturer in China. Nylon-6 Industry was established in 2005, the total investment of which has reached 1 billion RMB. Till the end of 2014, we have built three polymerization plants, and the yearly producing capacity has reached 100,000 tons for Nylon-6 chips and yarn, 60,000 tons for Nylon-6 cord fabric.

SHIFENG NYLON-6 production contains Nylon-6 middle & high viscose chips, Nylon-6 industrial yarn & UV yarn, Nylon-6 grey cloth & dipped cord fabric. Nylon-6 Chip is mainly used for industrial and civil spinning; Nylon-6 Yarn is mainly used for nylon fabric, nylon canvas, nylon geocloth and nylon rope; Nylon Dipped Fabric is mainly used as framework material for tires.

During the intense trade competition, SHIFENG unswervingly insists on the power of Technology, keeps on process innovation, technique innovation & management innovation, and continuously improving quantity, in order to keep the leader position. At present, SHIFENG has cooperated with most of tire companies in China, such as Triangle, Chaoyang, Double coin, Linglong, etc. SHIFENG Nylon-6 products have also been exported

world widely, such as India, Thailand, Pakistan, South & North Korea, Iran, Egypt, Bangladesh, etc.

SHIFENG is willing to continue to improve product quality and service quality in the future. We are importing more and more advanced machinery and technology from Germany and other countries, in order to build a world famous brand of Nylon6 products.
